

STANDARD WELLNESS PANEL

Overview:

The Evexia Diagnostics Standard Wellness Panel builds from the [Basic Wellness option](#) to assess overall wellbeing. This panel measures the basics, but also includes bilirubin, high-sensitivity C-Reactive Protein (hs-CRP), Gamma-Glutamyl Transferase (GGT), and insulin. A thyroid panel, homocysteine (which can be an indicator of vitamin B12, folate, and vitamin B6 deficiency), and DHEA-S (which can indicate adrenal function) are also incorporated.

This panel provides a comprehensive look at the function of the thyroid gland by measuring TSH, the free thyroxine index, total T4, and total T3. The thyroid controls the body's metabolism and also secretes hormones that are necessary for growth, development, and nearly every physiological process.

This panel also includes high-sensitivity C-Reactive Protein (hs-CRP). Studies have shown that measuring CRP with a high sensitivity test can help identify the risk of CVD. This test is different from the regular CRP test, which detects elevated levels of CRP in people with infections and inflammatory diseases. High normal levels of hs-CRP in otherwise healthy individuals are predictive of the future risk of heart attack, stroke, sudden cardiac death, and peripheral arterial disease, even when lipid levels are within acceptable ranges.

This panel comes with a free* Functional Health Report when Evexia Nutraceuticals are recommended. *A \$5 fee is applied when recommendations other than Evexia Nutraceuticals are selected.

Test Code	Test Name
001222	Bilirubin, Direct
005009	Complete Blood Count (CBC) With Differential
322000	Comprehensive Metabolic Panel (CMP-14)
120766	C-Reactive Protein (CRP), High Sensitivity
004020	DHEA-S (Dehydroepiandrosterone Sulfate)
324741	Ferritin + Iron + Total Iron-binding Capacity (TIBC)
001958	Gamma-Glutamyl Transferase (GGT)
102525	Hemoglobin (Hb) A1c With eAG

Test Code	Test Name
706994	Homocysteine
004333	Insulin
001115	Lactic Acid Dehydrogenase (LD / LDH)
004580	Lipid Panel + VLDL + TC/HDL Ratio + LDL/HDL Ratio + CHD Risk
001537	Magnesium
001024	Phosphorus
027011	Thyroid Profile II, Comprehensive; Tri-iodothyronine
001057	Uric Acid
003772	Urinalysis, Complete With Microscopic Examination
081950	Vitamin D, 25-Hydroxy
